

MN Polish-Cream

Polish and enhancer for natural stone tops

Description

A special product from the LITHOFIN-Range for marble, engineered stone and all other natural stone (MN). Lithofin MN Polish Cream is based on natural waxes, special additives and maintenance components.

Technical data:

Density: approx. 0,95 g/cm³

Appearance: paste, whitish

Odour: unspecific

pH-Value: approx. 10

Flash Point: >23°C

Properties

Lithofin MN Polish Cream is a care product that penetrates into the surface of the stone enhancing the colour structure and increasing the surface shine. With regular use, the surface can be polished to a high gloss. Surfaces become less sensitive to staining, scratches and similar blemishes. Used regularly, Lithofin MN Polish Cream is the optimal care treatment for marble, granite and other natural stones.

Field of use

For freshening up the polish and for protecting polished natural stone and engineered stone surfaces, especially marble and limestone. For touching up dull areas. Lithofin MN Polish Cream is highly suitable for polishing small areas such as windowsills, vanity tops, kitchen worktops and similar indoor surfaces.

Please note: On large surfaces use Lithofin MN Liquid Wax. Not recommended for honed or ruff surfaces.

Directions for use

Evenly apply Lithofin MN Polish Cream in circular motions using a cloth. After a maximum of two minutes, polish the surface with a soft cloth.

Please note: If the product is left on the surface for too long, it becomes difficult to polish. In this case, reapply Lithofin MN Polish Cream and polish immediately.

Coverage: Approx. 10 to 20m² per 500ml.

Storage

Keep tightly closed and cool. Not above 25°C, keep tin firmly closed. Shelf life of up to 2 years.

Further maintenance

We recommend that the natural stone surface is sealed with either Lithofin MN Stain-Stop or Lithofin Stain-Stop >W< prior to using Lithofin MN Polish Cream. For regular maintenance use Lithofin MN Easy Clean.

Environmental protection

Contains solvents, free of chlorinated hydrocarbons. Surfactants are biodegradable according to EU-Regulations.

Disposal: 500ml containers are made of environmentally friendly tin plate, 125ml containers are made of environmentally friendly polypropylene (PP). Clean containers can be recycled through collection system.
