

CNC Suction Cups

The Vuoto[®] is a demountable system, making it easy to change the rubber seals and pads on site. The rubber seals have a double lip and suction from top and bottom for more stability. With its anodized aluminium construction, the system is much lighter and prevents oxidation. The unit can be shipped in pieces to save room and shipping cost. The system quickly assembles in less than 2 minutes.

- Vulcanized rubber
- Replaceable double lip seal
- Anodized aluminium

Vuoto offers a large variety of square, rectangular and round suction cups.
